Our commitment to our customers is set in stone.

About Us

For nearly forty years BORIDE Engineered Abrasives has developed and manufactured abrasive products for industrial and consumer applications. Through our global network of suppliers and industry experts we distribute products that our customers need to improve their quality and productivity.

Our entire organization serves our worldwide customers and distributors with:

- Consistent, high-quality products
- On-time, error-free shipments
- Prompt, accurate information and answers

Precise process management, fact-based problem solving and extensive material science are important parts of our foundation. Our quality management system is based on ISO9001:2008. Both our Quality Policy and Core Values steer the company's operation.

Our dedication, skill and attitude is obvious. Every day our employees are working hard on improving our organization and all of our employees play a vital role in doing it better. It all starts with you; our customers, distributors and suppliers. Tell us what you need and we will do our best to accommodate your request.

Quality Policy

"Our customers are our reason for being." Our customers define product and service quality requirements. We listen to our customers, strive to understand their needs and meet their expectations with:

- Quality products consisting of bonded abrasive articles and related products for metal and ceramic finishing and grinding applications
- Extraordinary customer service
- Competitive pricing
- Technological leadership

"Employees are key to business success." We will encourage and support our employees to actively participate in the success of our business by:

- Providing a safe workplace
- Providing an environment of trust and respect
- Communicating thoroughly about our business
- Providing training to increase knowledge and skill

"Everything is done with a process." We will document, plan, control, monitor and audit our processes as a foundation for continuous improvement. We will measure our performance based on quality, safety, service, and manufacturing effectiveness and efficiency.

EDM Polishing Stones (Aluminum Oxide)

Golden Star

Made from select premium aluminum oxide grain and a proprietary treatment process, the Golden Star is of medium hardness with a fast breakdown offering quick material removal while contouring quickly and leaving a silky smooth finish. The Golden Star works on all tool steels and performs exceptionally on EDM surfaces, milling and machining marks. This stone does not require a lengthy pre-lubrication process and is terrific when used during hand stoning as well as with profilers.

General Purpose Stones (Aluminum Oxide)

AM-2

The AM-2 is an excellent all around finishing stone engineered for hand polishing all types of mold and die steels, including SAE 1030 pre-heat treated P-20, H-13, S-7 and T-420. Soft action combined with perfect breakdown also permits pre-finishing on non-ferrous metals such as aluminum, beryllium, kirsite and high chrome/nickel stainless steel.

General Purpose Stones (Aluminum Oxide)

AM-K

The AM-K is a white aluminum oxide stone of medium hardness that performs well on all types of mold steel. Generally, it is used dry for rough forming and removal of machine marks. Lubricants are used for finer grits. Some polishers use the 400 and 600 grits for finishing plastic molds and blow molds.

CS-HD

Compared to the CS or CS-M, the CS-HD is harder acting and slower to break down. It can be used to polish even the hardest die and mold steels. Polishers claim excellent results when finishing dies ranging in hardness from 47 to 63Rc. Some mold makers also use the CS-HD for removal of EDM.

Specialty Stones (Aluminum Oxide)

RASP

Made from select premium aluminum oxide grain, the RASP is our most versatile all-around finishing stone. It has an outstanding cut and finish on most tool steel, aluminum and even EDM surfaces. It is an excellent stone for flat lapping and contours quickly with a moderate breakdown.

Specialty Stones (Aluminum Oxide)

T2

This specialty treated medium-hard aluminum oxide stone cuts very fast and yet provides a silky, smooth finish. Even the most selective polishing 'pro' will like the T2 for high quality mold steel such as P-20, H-13, and 420 stainless.

AO

The AO offers excellent breakdown characteristics and yet retains its shape well, especially when polishing mold cavity details. Because the AO is filled with lubricant during the manufacturing process, it does not require lengthy pre-lubrication. 220 grit is an ideal “start up stone” for machined surfaces. Grits 220 and 320 work well in removing EDM scale.

Includes: Handpiece Holder, Handpiece Stand, Power Supply Cord.

Emax EVOLution Motor ENK 410S

08086

High speed, lightweight, small diameter, high torque. Compact general use type motor perfect for precision work. Speed: 1,000~40,000 RPM, 4.5' Straight Cord.

Emax EVOLution Torque Type Motor ENK 250T

08087

Excellent combination of high speed and high torque. Perfect for applications requiring large burs. Speed: 1,000~25,000 RPM, 4.5' Straight Cord.

Polishing Equipment

NSK Products

Ultra precision electrically / pneumatically driven polishing tools including drilling, polishing, grinding, engraving and deburring spindles, as well as ultrasonic polishing and cutting equipment. Air, electric and air turbine spindles and motors are also available for small diameter milling, drilling, slitting, chamfering and grinding applications.

Emax EVOLution & Rotus IH 300 Attachment

RE10178

Lever type attachment with slim, light weight, ergonomic design providing powerful yet delicate grinding and polishing. Exchanging a burr is simply made by turning the chuck control lever. Wrench is not required for exchanging the chuck.

Emax EVOLution & Rotus IC 300 Attachment

RE10182

90° angle attachment with a 1/8" Collet Chuck. Most suitable for polishing flat surfaces, corners and internal surfaces of pipes with paper disk mounted on rubber pad. Speed Reduction Ratio: 3/4. Weight: 1.6 oz.

Emax EVOLution & Rotus KC 300 Attachment

RE10266

Ideal for work at a 45° angle, especially corners and deep concave surfaces. Use the motor in reverse rotation for clockwise rotation. Speed Reduction Ratio: 3/4. Weight: 1.6 oz.

Mini Luster ML 8 Attachment

LS51307

A pencil type polisher. Light weight, compact design and minimal vibration keep hands fatigue free for continuous operation. Grindstone holder provided, various tools such as oil stone, Super Stone, Cristone®, diamond files, etc. can be used. Reciprocating stroke approx 0-7,600 times/min. Stroke Range: 0.8 mm fixed.

Swing Luster SLS 16

LS11380

Pencil type polisher suited for narrow grooves, and details. Compact design and minimal vibration keep hands fatigue free for continuous operation. Grindstone holder provided, tools such as oil stone, Super Stone, Cristone®, diamond files, etc. can be used. Stroke: 0–9,000 times/min. Stroke range variable: 0–1.6 mm.

NLS 110 Profiler (Built in Motor)

1483

Powerful reciprocating stroke polisher equipped with 1/4 Speed Reducer to multiply the torque by 4 times. The tilt angle is adjustable and the grinding surface can be set at any angle between 0 and 360 degrees enabling grinding of all sides of the surface without moving the profiler itself. Rubber grip absorbs vibration, reducing fatigue. Stroke: 0–7,600 times/min. Fully adjustable. Various standard attachment tools included.

Luster LS 100 Profiler

LS10815

The Luster LS-100 is a powerful reciprocating stroke polisher that is used with electric motor attachments such as the ENK-410S or ENK-250T. The tilt angle is adjustable and the grinding surface can be set at any angle between 0 and 360 degrees enabling grinding of all sides of the surface without moving the profiler itself. Rubber grip absorbs vibration, reducing fatigue. Stroke: 0–7,600 times/min. Fully adjustable. Various standard attachment tools included.

Detail Stones and Detail Stone Holders

Cristone® Crystal Fiber Stone

Cristone® Crystal Fiber Stones are made from using the highest quality, chemically produced crystal fibers.

The crystalline structure of the crystal fibers offers high polishing efficiency and incredible bending strength.

These are the perfect stones for detail polishing.

Wood Sticks and Diamond Foil

Wood Sticks and Diamond Foil

Our wood sticks are made of select balsa (very soft) and white birch (soft). Very soft sticks are used for final finishing with diamond or other compounds. The soft sticks are used for intermediate to final finishing with diamond or other compounds.

Our diamond foil is of the highest quality and offers aggressive cutting action in a wide range of grit sizes. The foil is applied to a flexible, adhesive backing and can be cut to size.

Also available in a
money saving kit.
SEE PAGE 91

Wood Sticks

Wide selection of wood sticks for lapping and finishing by hand or with reciprocating and rotary tools. Softer wood creates a higher surface finish while the harder sticks cut fast and hold shape longer.

Cratex® Small Wheels

Cratex® Small Wheels

Cratex® Rubberized Abrasives are made with oil-resistant chemical rubber. In contrast to conventional grinding wheels, the Cratex® bond has unique cushioned action. It cuts freely, smoothly and softly without gouging or digging into the work surface. It resists clogging or smearing, and is ideal for a broad range of applications where metallic or non metallic surfaces must be smoothed and polished without loss of dimensional tolerances or control.

100 pieces per package.

Also available in
money saving kits.

Belt Sticks

Versatile and economical for a wide variety of applications including mold finishing, metal finishing, woodworking, welding clean up, pattern making, gun repair and much more. They feature three working areas: a flat bottom, round end and a tapered end for intricate areas. Its spring-loaded tensioning device allows the abrasive belt to be quickly changed and/or rotated so that all areas of the belt can be used. The ergonomic shape of the Belt Stick adds comfort and the thumb and finger supports add control. Supplied in five colors to quickly distinguish one grit from another.

Accessories

BORI-LUBE 10 Polishing Lubricant

L10G

BORI-LUBE 10 is formulated for mold polishing to clean, lubricate and prevent stone loading. Environmentally friendly and non-hazardous, BORI-LUBE 10 is available in gallon size containers.

Premium Stoning Oil

336040 - PINT

336030 - GALLON

Premium Stoning Oil is an ideal lubricant to use with all of our mold and die polishing stones and coated abrasives. Prevents stone loading and allows for more consistent and free cutting action.

Mold Polish

332000

Unique to the industry, our mold polish is offered in a 20 gram controlled syringe to allow precise application without the fear of contamination. BORIDE mold polish is odor and residue free, non-hazardous, and non-corrosive. It will remove rust, oxidation, diamond polish haze, plate out and stains on fine tooling surfaces.

Simichrome Polish

332002 – 50 GM TUBE

332003 – 250 GM TIN

Simichrome Polish removes tarnish, dirt and oils, and generally renews polished metal surfaces while leaving a protective film which retards oxidation. Simichrome works well on brass, bronze, chromium, and aluminum and is recommended for use after diamond compound. It can be rubbed on and removed with a soft cloth; or it can be used with a clean felt bob.

Rib Light and Rib Light Reach

Excellent for illuminating those hard to see spots like ribs and slots. Standard pen light or the bendable 'gooseneck' style. Includes 3 AAAA batteries.
